

# Polyether Polyol YD-403

Release Date: 2019.04.17

Version: 2.0

## Application

YD-403 is a kind of polyether polyol initiated with ethylenediamine. It is suitable for rigid polyurethane foam with excellent insulation property, especially as a material used in the system of spray foam and panel.

## Specification

Appearance	Colorless liquid
Viscosity@50°C (mPa.s)	1800~2600
Colority (APHA)	≤50
Hydroxyl Value (mgKOH/g)	730~810
Water Content %	≤ 0.1
pH Value	9~12

## Package

We can supply galvanized iron drum, plastic bag, IBC, tank container or car tank for packing and transportation.

## Storage

Containers should be stored tightly sealed in a dry place and be kept away from foods, animal feeds, acids, oxidant. The temperature recommended for storage is 15~35°C. For long term storage in tank, nitrogen protection is recommended.

## Shelflife

12 months under proper storage.

## Matters need attention

Please refer to the “material safety data sheet” or follow local laws and regulations.
