

Polyether Polyol YD-4110

Release Date: 2019.04.17

Version: 2.0

Application

YD-4110 is a kind of polyether polyol initiated with sucrose. It is suitable for rigid polyurethane foam with excellent insulation property, especially as a material used in the system of refrigerator, freezer and water heater.

Specification

Appearance	Light yellow liquid
Viscosity@25°C (mPa.s)	6000~8000
Colority (GD)	≤10
Hydroxyl Value (mgKOH/g)	445~475
Water Content %	≤ 0.15
pH Value	10~12

Package

We can supply galvanized iron drum, plastic bag, IBC, tank container or car tank for packing and transportation.

Storage

Containers should be stored tightly sealed in a dry place and be kept away from foods, animal feeds, acids, oxidant. The temperature recommended for storage is 15~35°C. For long term storage in tank, nitrogen protection is recommended.

Shelflife

12 months under proper storage.

Matters need attention

Please refer to the “material safety data sheet” or follow local laws and regulations.
