

Polyether Polyol YPOP-2045

Release Date: 2019.04.17

Version: 2.0

Application

YPOP-2045 is a high solid content polyether triol grafted with styrene and acrylonitrile copolymer. The combination with conventional slabstock polyether polyol for example YD-3031 could achieve wide foam load bearing property.

Specification

Appearance	While to yellow liquid
Viscosity mPa.S@25℃	3800~6000
Hydroxy number mgKOH/g	28~32
Solid content %	44±2
Water content %	≤0.08
pH Value	6-9

Package

We can supply galvanized iron drum, plastic bag, IBC, tank container or car tank for packing and transportation.

Storage

Containers should be stored tightly sealed in a dry place and be kept away from foods, animal feeds, acids, oxidant. The temperature recommended for storage is 15~35℃. For long term storage in tank, nitrogen protection is recommended.

Shelflife

12 months under proper storage.

Matters need attention
